---

### APPLIES TO:

---

Enterprise Manager for Oracle Database - Version 13.2.0.0.0 and later  
Information in this document applies to any platform.

### GOAL

---

How to remove the AWR Warehouse configuration from the AWRWH Repository database and source databases?

### SOLUTION

---

Currently, there is no method of removing the configuration from the UI (user Interface) it self. Manual cleanup steps are presented next.

**WARNING** - the below steps will irrevocably remove any existing warehouse setup!

1. Run on the EM repository database as SYSMAN user:

```
delete from db_caw_repos;  
commit;
```

2. Run on the AWR Warehouse repository as SYS user:

```
exec dbsnmp.mgmt_caw_load.drop_job;  
exec dbsnmp.mgmt_caw_load.drop_schema;  
drop package dbsnmp.mgmt_caw_load;  
commit;
```

3. Run on the source Database (optional) as SYS user:

```
exec dbsnmp.mgmt_caw_extract.drop_job;  
exec dbsnmp.mgmt_caw_extract.drop_schema;  
commit;
```
